

Moderne Development

Executive Summary

BUILDING A BETTER TOMORROW, TODAY

The Business Opportunity

Moderne presents a differentiated real estate investment opportunity rooted in the strategic use of modern methods of construction. As a developer—not a tech manufacturer—we integrate advanced technologies such as robotic construction, modular delivery, and AI-powered design into our real estate projects to enhance speed, reduce cost overruns, and mitigate development risk. While innovation in digital design and construction robotics continues to evolve, industry-wide adoption has lagged. Moderne bridges that gap—accelerating project delivery, improving build quality, and unlocking superior financial performance across a range of developments.

Company Description

Moderne Development tackles the most pressing challenges in real estate construction—labor shortages, inefficiency, and rising costs—by integrating proven modern methods into every stage of our development process. Rather than building the technology ourselves, we apply robotic precision, modular systems, and digital design tools to streamline execution, reduce waste, and accelerate timelines. For example, what traditionally takes 8–12 workers two weeks to complete can now be achieved in just 5 days with 2–4 skilled operators—cutting labor demands and minimizing delays. This approach not only improves margins and de-risks project delivery but also supports scalable, sustainable growth across our residential and mixed-use portfolio.

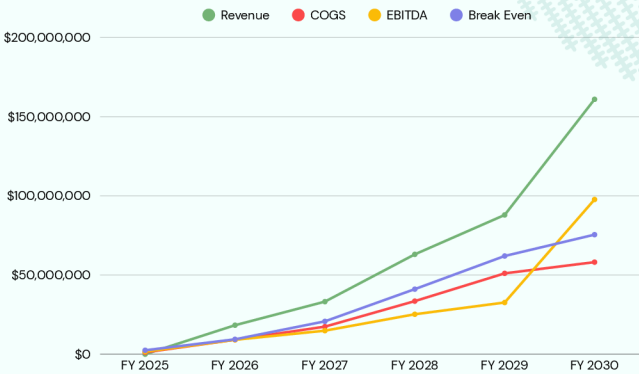

Strategies

Key Area	Strategy
IP Development through Pilot Project	Execute strategic pilot projects to forge partnerships with leading technology manufacturers such as Putzmeister and ICON.
Scalability & Deployment	Following successful pilot project completion, initiate large-scale deployments across the U.S., U.K., and Jordan markets.
Market Expansion	Leverage data-driven insights from initial deployments to strategically expand into key real estate markets including Saudi Arabia, Europe, and Africa.

Financial Summary

Moderne Development is positioned for strong, scalable growth over the next seven years by aligning global development initiatives with a proven, technology-enabled execution model. Through active real estate pipelines in the U.K. and Jordan—operated via our subsidiary, RMMC—and validated pilot projects in the U.S., we’ve demonstrated the cross-market viability of our approach. By integrating modern methods of construction with disciplined project management and robust governance, we reduce development risk while enhancing speed and profitability. This strategic foundation supports our expansion into additional regions, building on early successes to drive long-term value across global markets.

Financial Projections

Team

Our team combines seasoned corporate managers, skilled engineers, and experienced construction professionals, bringing a wealth of expertise to the table. With a proven track record of collaborative success, our leadership excels in efficiently operating cutting-edge robotic systems and implementing modern construction methods. Demonstrating our industry credibility and innovative approach, we’ve secured strategic alliances with technology manufacturers, enabling us to leverage their products in our developments both domestically and internationally.

Funding Requirements

Moderne is seeking **\$2.5M** in strategic capital to launch its initial U.S. pilot projects and accelerate expansion into the U.K. and Jordan through our subsidiary, Robotic Modern Method Construction Ltd. This funding will support early-stage project execution, enabling rapid validation and positioning the company for scalable international growth. We project an 18-month return on initial deployment, with recurring cash flow from completed developments fueling broader market expansion.

Forward-looking statements reflect current expectations and are inherently uncertain, and actual results may differ significantly from projections herein. While projections are based on experience and good faith judgments, the recipient should understand that projections are based on numerous assumptions about how individual companies, sectors, industries or the general markets perform, and that actual performance may vary significantly from such projections. Although we believe that the expectations reflected in all forward-looking statements are reasonable, it cannot guarantee future results, performance, or achievements.
