

MODERNE DEVELOPMENT, INC

BUILDING A BETTER TOMORROW

OCTOBER 2025

EXECUTIVE SUMMARY

Driving the Future of Construction with Robotics and Automation

ACCESS

Proprietary Access and **technical know-how** with the world's most advanced 3D construction robotics, including systems used in the largest 3D-printed communities and international pilot projects.

ROBOTIC DIGITAL CONSTRUCTION

A **scalable, capital-efficient, and sustainable** solution to global housing demand and labor shortages.

GROWING IP PORTFOLIO

Protects **system workflows, building designs, and digital integration processes**, forming a defensible competitive advantage.

EARLY-STAGE

Attractive early-stage valuation offers substantial upside for investors participating in this capital round.

THE PROBLEM

THE INDUSTRY HAS BEEN SLOW TO ADOPT NEW TECHNOLOGIES

FRAGMENTED & INEFFICIENT

A typical project involves 100+ subcontractors with no centralized workflow, leading to delays, errors, and cost overruns. No automation from land acquisition to sale; decision-making is **slow and siloed**.

IMPOSSIBLE TO SCALE.

Most builders rely on local labor, personal networks, and physical proximity, making replication difficult.

AGING, TECH-RESISTANT WORKFORCE.

U.S. construction job vacancies rose **47%** from 2019–2023, with skilled labor retiring faster than it's replaced.

THE INDUSTRY DEMANDS CHANGE

CLIMATE RESILIENCE

Hurricanes, fires, and floods require faster, stronger, weather-adaptive building methods.

REGULATORY PRESSURE

Laws like the UK Building Safety Act and Sweden's ID06 mandate digital traceability and worker data.

NEED FOR SPEED & SCALE

Interoperable platforms, openBIM standards, and AI-driven workflows are the only way to scale construction intelligently.

THE CURRENT OPPORTUNITY

Architecture, Engineering, & Construction (AEC) Tech is Crossing the Adoption Tipping Point.

50 BILLION DOLLARS INVESTED INTO AEC

TECHNOLOGY (2020–2022)

Up **+85%** from the previous 3-year period, showing rapid institutional interest in scalable, tech-enabled construction solutions.

REGULATIONS ARE FORCING DIGITIZATION

UK Building Safety Act mandates a digital ledger of all building data for residential construction.

Sweden's ID06 requires digital worker identity and compliance records on all job sites.

DEMAND FOR INTEROPERABILITY IS RISING

Builders, developers, and governments are adopting open standards (e.g., openBIM) and connected platforms to streamline project delivery and asset management.

RESIDENTIAL & COMMERCIAL PROPERTY SECTORS NEED FULL LIFECYCLE INTEGRATION

AEC technology is increasingly linked to Property Technology (PropTech), bridging the gap between design, construction, finance, operations, and long-term maintenance.

DEVELOPER ENABLEMENT

Only developers can truly drive construction innovation, because they control the full lifecycle from land to delivery, something no architect, contractor, or tech vendor can deliver alone.

TOTAL ADDRESSABLE MARKET PRESENTS A GLOBAL OPPORTUNITY

GLOBAL HOUSING DEMAND:

5+ Million Homes Built Annually

Traditional methods are too slow, labor-intensive, and vulnerable to supply chain disruptions; creating a global need for faster, tech-enabled alternatives.

UNITED STATES OPPORTUNITY

- Active pipeline in Texas and Florida, with scalable residential projects in Austin and Canyon Lake.
- Opportunity to serve both single-family and medium-density developers looking to industrialize housing delivery.

3.9 Million+ annual home deficit in the U.S.

- Capturing just 1% of the U.S. deficit could result in **40,000** homes a year for Moderne, which is estimated to be **\$3B** in project revenue.

UNITED KINGDOM OPPORTUNITY

- 200,000+ homes built annually.
- 50% of SMEs cite labor shortages and cost as key barriers to delivery.

Revenue potential from just 4% UK market share

- Capturing just 4% of the UK market alone would equate to **\$114M** in projected revenue, excluding upside from U.S. and international expansion.

STRATEGIC FOCUS: LARGE-SCALE PROJECTS

- Robotic and digital construction delivers the greatest returns on repeatable, high-volume developments, where automation replaces costly manual workflows.

EMERGING MARKET OPPORTUNITY

(MENA & GLOBAL SOUTH)

- Governments in Jordan and GCC nations are actively exploring 3D printing, MMC, and climate-resilient housing
- Moderne's proposed projects in Jordan align with national housing strategies and international funding goals

MODERNE BUSINESS MODEL

MODERNE'S ADVANTAGE

SPEED & EFFICIENCY FROM DAY ONE

STRUCTURAL STRENGTH + IP PROTECTION

DESIGN ONCE, DEPLOY MANY

BUILT TO SCALE REMOTELY

MORE AFFORDABLE CONSTRUCTION

MODERNE DEVELOPMENT - BUILDING A BETTER TOMORROW

DEMONSTRATED TRACTION

5 YR Home Unit
Construction Pipeline

5 YR Revenue
potential

U.S. PIPELINE

AUSTIN, TX – 3D PRINTED RESIDENTIAL (JV WITH BROWNSTONE CAPITAL)

- **Phase 1:** 4-home pilot using ICON 3D printing technology
 - **Project Value:** \$3.5M | Estimated Rev for end of Q4: ~\$200K
- **Scalability:** Site expandable to 10+ homes, fully permitted
- **JV Structure:** Financed through a dedicated joint venture fund with Brownstone Capital
- **Pipeline:** Up to 40 additional homes under evaluation in downtown Austin infill sites
- **Current Domestic Pipeline:** Estimated at **\$20M+** with expansion potential across Texas and Florida

DOMESTIC

UNITED KINGDOM PILOT

WITH ONE OF THE UK'S LARGEST HOMEBUILDERS

- Completed 3D printed wall sample and full system evaluation with global tech vendors.
- Preparing a corner unit prototype and demo build for testing in Birmingham, UK (Q1–Q2 2026).
- Pilot project planned for 6–10 townhomes, with average home sizes of ~70m² over 3 stories.
- Following pilot success, plans to scale into 100–200 townhomes per year, with long-term potential for thousands of units.
- Aligns with UK's MMC mandates, labor shortages, and demand for sustainable housing.

GLOBAL

STRATEGIC ALLIANCES & PARTNERSHIPS

Moderne Development has built a robust ecosystem of best-in-class partners spanning construction technology, AI, design, manufacturing, academia, and finance, all integrated through proprietary digital workflows.

CONSTRUCTION TECHNOLOGY & ROBOTICS

DESIGN, SOFTWARE & AI INTEGRATION

STRATEGIC BUILDING PARTNERS

MODERNE DEVELOPMENT - BUILDING A BETTER TOMORROW

IP PROTECTION

PATENT PORTFOLIO

4 UTILITY PATENTS FILED
(U.S. and internationally)

10 ADDITIONAL PATENTS IN PREPARATION
Targeting both hardware and software elements
of our system.

Focus Areas:

- Structural integration of 3D printed walls + SCIP panels.
- Multi-material print sequencing and reinforcement.
- Automated design-to-print pipelines for real estate development.
- Modular BIM-to-fabrication logic and component libraries

WHY THIS MATTERS

Protects both physical and digital IP: from printable structural assemblies to platform-enabled design automation
Enables regional licensing, international JV structuring, and recurring revenue models tied to system usage
strengthens Moderne's position as a tech-first real estate platform, not just a developer.

TYPES OF IP PROTECTED

- **Utility Patents:** Protect core systems, methods, and workflows — the “how it works” backbone of Moderne's tech stack.
- **Design Patents:** Protect visual and structural features of components and assemblies — especially for modular and prefab builds.
- **Trade Secrets:** Internal processes, formulation additives, and automation logic kept confidential for competitive advantage.
- **Copyrights:** Custom BIM models, template libraries, and software tools under proprietary control.

OUR TEAM

EDGAR MUNOZ - FOUNDER/CEO

A visionary technologist, inventor, and executive with over a decade of experience leading innovation at the intersection of aerospace, construction, and automation. He has raised over \$13 million in capital across early-stage ventures and served as a strategic operator in both startup and institutional environments. A recognized contributor as an active member of the ASTM Additive Construction Committee. He has worked with global organizations including the FAA, ICAO, IBM, ANSI, and private equity networks across the U.S. and Asia. As former CEO of Aeronyde Corporation, he oversaw the development of autonomous aerial systems and earned the Finance Monthly CEO Award in 2018. In 2023, he was named to Who's Who in America for his executive leadership and contributions to advanced technologies. Edgar's transition into construction innovation was catalyzed by his role as Head of Business Development for Apis Cor, the world-renowned 3D construction printing manufacturer. There, he led investor relations, structured business operations, and managed communications with brokers, dealers, and transfer agents.

ALESSANDRO LANNES - FOUNDER/COO

A lifelong advocate for bridging the gap between emerging technologies and enterprise execution, Alessandro Leverages a strong foundation in process optimization, tech-platform consulting and operations engineering, bringing a unique blend of strategic systems thinking and hands-on implementation expertise to the development space. Prior to joining Moderne, he directed growth strategy and systems architecture for B2B and e-commerce organizations — delivering rapid revenue expansion, streamlining sales and marketing workflows and architecting cloud-based operational ecosystems.

By applying his consulting-era skillset in technology stack integration, workflow optimization and strategic metrics management, he ensures that the company's vision is matched by operational discipline.

Alessandro is committed to delivering buildings built smarter, faster, more sustainably and at scale. He is actively shaping the future of real-estate development.

ROBERT MECHELSEN - INNOVATION DIRECTOR

A building innovator who combines software and concrete to create innovative and sustainable solutions for the construction industry. He has over 30 years of experience in designing and building carbon-neutral, modular, and smart homes, apartments, and high-rises around the world. He is the founder of VERTIKAAL, a software platform that automates the design process and generates 5D BIM data for cost estimation and scheduling. He is also the executive creative director of Studio RMA, a design-build firm that specializes in SCIP (Structural Concrete Insulated Panels) technology. He designed the Hi'ilani EcoHouse, the first concrete-built carbon-neutral home in the USA.

PAUL CEJAS - BOARD MEMBER

Former Chief Engineer at Boeing Defense Systems, led award-winning teams in engineering innovation and advanced technology application, including the development of the QF-16 target drone and MQ-28 Ghost Bat unmanned wingman. With expertise as a Lean Manufacturing advisor and Internal Auditor, he has a proven track record of improving operational processes. Since taking early retirement from Boeing, Paul has been consulting for startups developing disruptive technologies, focusing primarily on green technologies in energy, recycling, and construction, helping them transition from prototypes to production.

DANIEL WHITE - SALES DIRECTOR

A sales professional with over 20 years of experience across a diverse range of industries, including medical devices, manufacturing, and distribution. As a seasoned sales leader, he has managed teams of up to 45 sales reps with diverse backgrounds, fostering a positive and productive culture that enabled the team to exceed their goals.

ZACKARY HOWLEY - CONSTRUCTION DIRECTOR

With over a decade of hands-on experience in the construction industry, Zack brings deep field expertise across heavy equipment operations, concrete piling, and structural assembly. He began his career working on large-scale commercial projects and became one of the youngest crane operators licensed in the state of Florida. Zack has served as a foreman, equipment operator, and quality control lead, contributing to mission-critical projects for Blue Origin and SpaceX Launchpad 39A. He was also the General Contractor for the first model home constructed by 3D printer manufacturer Apis Cor in Florida, giving him firsthand experience in additive construction and a unique understanding of how to adapt innovative technologies to field conditions.

JAMES GUIANG - BOARD OF DIRECTORS INVESTOR REPRESENTATIVE

A geophysicist with more than 40 years of experience in the oil industry starting with Exxon, Amerada Hess and Conoco. During the past 25 years Jim has been an investment manager and financier specializing in emerging markets in the international oil & gas industry. More recently (2006-12), Jim was Managing Director-Natural Resources at Millennium Global Investments Ltd. in charge of the MG Natural Resources Fund, and advisor to the MG High Yield and MG Africa Opportunities Funds.

PAUL GROEPLER - INVESTOR

Paul F. Groepler is an accomplished investor and entrepreneur with over 30 years of experience in both large corporations and startups. He has worked with Fortune 500 companies such as Motorola, Sun Microsystems, Daimler-Benz, DELL, and IBM. Mr. Groepler has co-founded seven successful ventures, including Technology Works, Aeon Technology, and Leapfrog Wireless, and has played a role in the IPOs of Sun Microsystems and Dell. He also has extensive experience as a Swiss fund manager and has consulted for prestigious organizations like the United Nations and Max Planck Institute. Holding a B.S. in Computing Science and Electrical Engineering from Texas A&M, he also pursued a Master's in Data Science and Economics from MIT.

STRONG PROJECTED REVENUE AND GROSS MARGIN GROWTH

TECHNOLOGY ENABLES SCALABLE OPERATIONS

FINANCIAL KEY ASSUMPTIONS

U.S. Projects per year	15
U.S. Houses built per year	300
Avg. Revenue per Project	\$2,300,000
Gross Margin per Project	\$248,000
5 YR Real Estate Transaction Value	\$4 Billion
Global Expansion	U.K. & MENA

CORE REVENUES AND GROSS MARGIN 5 YEAR

Robots in operation	100+
Houses built	11,000+
Revenues	\$112 mm
Gross Margin	\$73 mm

Forward-looking statements reflect current expectations and are inherently uncertain, and actual results may differ significantly from projections herein. While projections are based on experience and good faith judgments, the recipient should understand that projections are based on numerous assumptions about how individual companies, sectors, industries or the general markets perform and that actual performance may vary significantly from such projections. Although we believe that the expectations reflected in all forward-looking statements are reasonable, it cannot guarantee future results, performance, or achievements. Reliance upon information in this communication is at the sole discretion of the reader. The model is available upon request.

ASK

MILESTONES FUNDED BY THIS ROUND

Scaling partnerships with ICON, Printerra, Putzmeister/Instatiq, and others

Demonstration corner unit + full prototype completed for UK demo partners

Completion of U.S. residential pilot (Austin, TX) and expansion to 10+ homes

Launch of UK pilot with Barratt Developments (6–10 townhomes in Birmingham)

Launch of AI-enabled digital platform for land screening and design automation

Filing of 10+ new patents, advancing IP portfolio and licensing potential

Estimated support for \$20M+ in project pipeline execution

PROPOSED TERMS

- **Raise:** \$5M
- **Structure:** Preferred equity (Series A)
- **Proposed Valuation:** \$36M pre-money
- **Target Close:** Q2 2026

CATEGORY	ALLOCATION	PURPOSE
TEAM & RUNWAY	\$2M	Support core engineering, development, and deployment teams over 24 months
SALES & GO-TO-MARKET EXECUTION	\$2M	Strategic business development, marketing, partner onboarding, and pilots
R&D & IP DEVELOPMENT	\$1M	Patent filings, certification testing, material science, digital workflows, and robotic integration

WHY MODERNE, WHY NOW?

PREMIUM CONSTRUCTION PROCESS

Outperforms competitors in speed, mobility, design flexibility, and aesthetic quality.

DIGITAL + PHYSICAL INTEGRATION

Combines proprietary screening tools, design automation, and robotic delivery to become the preferred subcontractor for high-performance wall systems.

VALIDATED BY LEADING PARTNERS

Pilots underway in UK, US, and with top-tier robotics vendors ICON, Putzmeister, Printerra, RIC Robotics.

SUSTAINABLE, SCALABLE STRATEGY

Built to scale globally via repeatable, modular systems, from residential housing shells to large-scale commercial infrastructure.

TIMELINE ASSEMBLY

Early-stage, high-growth platform with robust IP, global traction, and a capital-efficient model, offered at a compelling valuation.
